- A reliable new bait suitable for both rats & mice.
- Contains numerous human food grade ingredients to make SureFire BROMA the most palatable bromadiolone bait on the market, ensuring rapid eradication of rodents.
- Available in a distinctive 15g average weight blue block to give you 25% more bait placements than competitors'.
- Extensive treatment and placement options on the label.

developed & manufactured by PCT — an Australian Company.

SureFire BROMA Rodenticide

a PCT product

PEST | CONTROL | TECHNOLOGIES
INTERNATIONAL PTY LTD

SureFire BROMA BLOCKS RODENTICIDE are a bromadiolone based formulation featuring our enhanced blend of locally sourced food-grade materials which have been demonstrated as providing superior palatability and attractiveness to rodents. They also contain a powerful bittering agent to reduce the likelihood of accidental human consumption. SureFire BROMA BLOCKS RODENTICIDE come as an extruded wax block with an average weight of 15gm and are packaged in sizes ranging from 150g & 1kg soft pouches thru to 2.4kg & 8kg buckets.

REGISTERED FOR:

In and around domestic homes, industrial and commercial buildings, animal houses, farms, wharves, public service buildings, food factories, hospitals, inside transport vehicles (including ships and around grain terminals).

- Use indoors or outdoors
- Particularly suitable for use in damp situations
- Contains human taste deterrent to reduce likelihood of accidental consumption by children
- One feed—fast acting

SureFire BROMA BLOCKS RODENTICIDE are complemented by our other products in the SureFire range. Ask one of our sales staff for details.
